I am a Full Stack PHP / LARAVEL and MERN Stack developer / DevOps Expert / Project Manager with 05 years of experience. My expertise lies in creating efficient web applications by leveraging the power of Laravel & Node.js for the back-end and jQuery / React for interactive front-end development. I am a detail-oriented problem solver who enjoys collaborating with teams to deliver high-quality work. With a passion for staying updated on industry trends, I strive to create exceptional digital experiences for users.

## Experience 05 years

- **Full Stack PHP/LARAVEL Developer at GoMeat, USA (Remote)** Present
  - Developing an order management food/meat delivery application as a solo developer.
  - Simplifying our query processes for ultra-fast deliveries, ensuring a smooth customer experience that leaves our clients extremely satisfied
  - Implementing Block chain feature.
  - Implementing the coin based feature.
  - Large-scale Reporting and Invoices.
  - Huge number of customers with large amount of orders.
  - Continuously improved and optimized the application to ensure its scalability, reliability, and performance.
